

Director, Toxicology/Mass Spectrometry, Clinical Chemistry Laboratory, Department of Pathology, Brigham and Women's Hospital, Boston, MA

The Department of Pathology at Brigham and Women's Hospital, a principal teaching affiliate of Harvard Medical School, is seeking a Director of Toxicology/Mass Spectrometry. This is a recently established position within the Clinical Chemistry Laboratory that performed over 5 million tests in 2010 and services a 770 bed hospital.

The ideal candidate will possess one of the following qualifications: (i) PhD degree in Chemistry or a related field with a minimum of 1 year experience with toxicology and/or mass spectrometry; (ii) MD degree with mass spectrometry and/or toxicology experience and Board Certification or eligibility in Clinical Pathology. A successful applicant is expected to maintain procedures for routine toxicology screening, develop and maintain complex toxicology confirmatory testing, set up methods in other areas of mass spectrometry and clinical chemistry testing, provide clinical consultation and test interpretation and have an active role in teaching Clinical Pathology residents and medical students.

The Department of Pathology is currently undergoing targeted growth in advanced diagnostic testing and provides unparalleled opportunities for clinical, translational and basic research. Collaborations in many areas of science and innovative educational technologies are available with investigators in multiple Harvard-affiliated institutions.

Please send your curriculum vitae to the following address:

Petr Jarolim, MD, PhD
Department of Pathology
Brigham and Women's Hospital
75 Francis Street
Boston, MA 02115
